How About

my monthly visits to Elba

I will be at The Peoples Drug Store on Wednesday,

Alabama, described as follows: Begin at the southwest corner of Block numbered 3 and run in a northrly direction along the east de of Polka Street 100 feet; thence to the right at an angle of 90 degrees in an east-erly direction, run 70 feet to lot now owned by Fountain Motor Company, thence south along the west line of Fountain Motor Company 100 feet, more or less, to Davis Street; thence in a westerly direction along the northern line of Davis Street 70 feet, more or less, to the point of begin-

the Alabama Polytechnic Institute governmental positions in the copper sulphate."-Julian Brown, N every sense of the word, Alabama Power Company is a citizen of Alabama. In 61 of the 67 counties we own property and transact business. To the up-building of every county goes the

> bama for materials and supplies. In the 422 communities we serve, and of which we are a part, we can succeed only by making other interests move forward. If they prosper and progress, we also grow and develop. Our wholehearted interest as well as our physical equipment is with them, to stay.

millions of dollars we pay in wages and

taxes, and the great sums we expend in Ala-

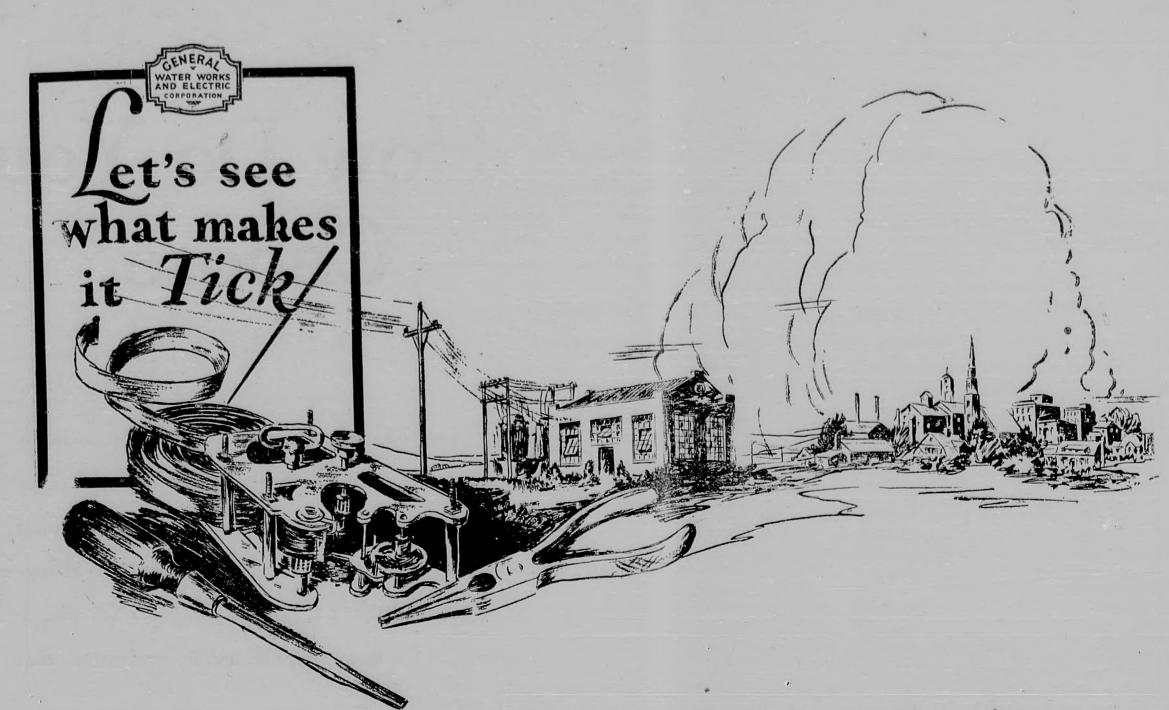

To you - our fellow citizens of these communities - when we offer you something, be it a kilowatt hour, an electric iron, a lamp or whatnot, it must serve you well. For unless what we bring you pleases you, adds to your comfort and convenience, we have failed. We can continue to exist only by providing something that will be of service to the man or woman using it.

So we are careful. We exercise the utmost precautions and bend our best efforts to assure you of good service. We spend great amounts of money building to keep ahead of your needs. We painstakingly pick and choose the men and women who can serve you best as our representatives.

Yet, now and then we fail. Often we do not know it. Far flung across the map of Alabama, things do happen in this Company which we did not plan, and which we would prevent.

We call upon you to help us. If we do not live up to our job - if something goes wrong, big or little, that should have gone right — let us know about it, so we may rectify the error, correct the system and carry our service to you that much nearer perfection. No service is perfect, but by your help we can make ours as nearly so as is humanly possible.

ALABAMA POWER COMPAN

THE ELBA CLIPPER

Let's just "take the clock apart and see what makes it tick".

> In this case "the clock" is your power company.

FTER WE have examined those huge machines generating dependable electric energy for you to read by, to cook and heat water and make ice with in your own home . . . to supply power to your radio and your phonograph ... to provide light to work by and turn the wheels of industry... to light your streets and your stores . . .

The day of the "coal oil lamp" is gone-and with its passing has come a new and important era . . . its symbol is the electric light.

Recently Thomas A. Edison was asked what he considered his most important gift to civilization. "Electric light and power" was the instant reply of the greatest inventor of any age. He explained that electric light and power has helped to free more people from uninteresting, dull, disheartening duties than any other force

known to civilization.

After we have examined all that, let's get to the vital part . . . pass by the cog wheels and get to the main spring, the human part of it! That's the heart of it, and it is the heart that makes it tick. That's the part that has to do with men and women who are inspired with that

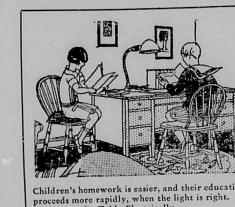

sire to build . . . to create . . . to see the actual growth and prosper- recognition of the assets of this ity that are the natural result when capital and effort, directed in the spirit of service, work together.

And this in turn has impelled your power company to its expansion and rebuilding program. This, and the vision and faith that foresees the future needs of your trade territory and ours All this means service to you. Ever think of it that way? Your power company must build far in advance of your needs, you know, that you may go on creating and building and progressing uninterrupted. And as one of the largest single investors in this territory your power company is naturally most interested in its growth and development, as only by its development may your power company expand.

It is this buman part that makes the clock tick, that fosters the growth of this community by extending power to near-by communities that they may prosper and contribute to the prosperity of all whom we serve.

It is the heart of the "clock" that secures the capital to provide far in

most fruitful of desires . . . the de- advance for the future needs of your city; that strives for the

community and its possibilities; that works for the development and use of your natural resources; that seeks the closest cooperation with the Chamber of Commerce, with the newspaper, with governmental authorities and civic clubs; that works to bring new industry and new payrolls here; that is constantly alert to serve every home with better service.

It is the heart and brains behind the powerful complex machinery; the men and women imbued with the spirit of service, the desire to build, that makes the clock tick ... that makes the wheels of your power company go round.

How Do You Choose?

Every time you make a purchase you make a choice. Buying a certain product may be so much a matter of habit that you don't realize you are choosing. But the fact remains that in accepting one brand of goods you are always rejecting others; and the satisfaction you get from what you buy depends on the knowledge of quality and values that guides your selection.

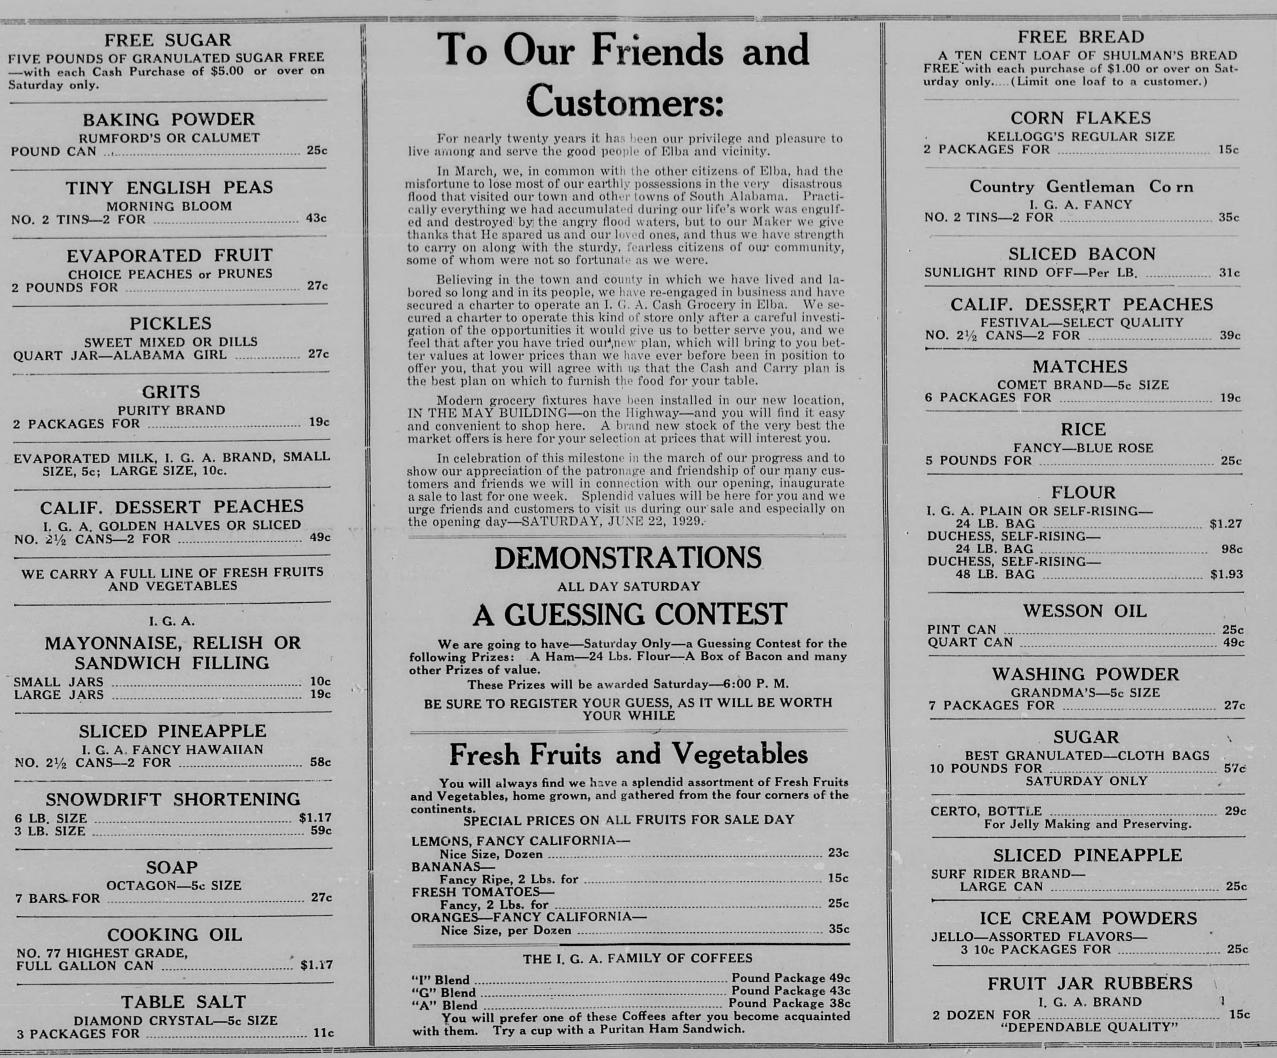

How do you know which bed-sheets, or which roofing material, or which radio will give you service you require? You can't personally test everything you buy and compare it with all the other products in its class. But there is a way to find out which brand fits your needs.

The people who are most successful in their buying---who achieve the highest percentage of satisfaction from the things they own and use---are those who consistently read the advertising columns, and buy consistently advertised goods.

Choosing isn't just "guessing" when you follow the guidance of the advertisements.

You Can Depend on Advertised Goods It pays to read the Advertisements

GRAND OPENING SMITH BROTHERS' I. G. A. GROCERY Saturday, June 22, 1929
